With the capabilities of leveling and blanking 24 Gauge up through 1/2" thick material, **Crawford Steel** can supply you and your customers with a wide range of products as our inventory consists of pattern sizes as well as "off-pattern" sizes that can be utilized to minimize scrap for your applications. Additionally, **Crawford Steel** offers full service slitting capabilities from 24 gauge up to 3/8".

At **Crawford Steel** we distinguish ourselves from the competition by providing customers with a strong commitment to quality, customer service and warehousing an extensive inventory.

We provide extremely competitive pricing and believe that strong relationships should be the cornerstone of the sales process. If you do not see the product, gauge or grade you are looking for, please contact one of our sales associates for more information on availability.
